17 GOALS TO TRANSFORM OUR WORLD
MoodleNet is a new open social media platform for educators, focused on professional development and open content.

It aims to sustainably empower communities of educators to share and learn from each other to improve the quality of education, and will be an integral part of the Moodle ecosystem.
MoodleNet es una nueva plataforma abierta de redes sociales para educadores, centrada en el desarrollo profesional y el contenido abierto.

Empodera de modo sostenible las comunidades de educadores para que compartan y aprendan unos de otros para mejorar la calidad de la educación, y será una parte integral del ecosistema de Moodle.

Integration with Moodle Core

User wants to add resource from a Moodle instance to a MoodleNet collection

MoodleNet

Moodle repository

Moodle instance (e.g. MoodleCloud)

Resource with public URL added to user’s MoodleNet collection

User authenticates and agrees to resource being uploaded to Moodle repository
“In... a decentralized system, there is no single centralized authority that makes decisions on behalf of all the parties. Instead each party (also called a peer) makes local autonomous decisions towards its individual goals... and share[s] information or provide service to other peers.”

(Rohit Khare)
"En... un sistema descentralizado, **no existe una única autoridad centralizada** que tome decisiones en nombre de todas las partes. En su lugar, cada parte (conocida como par) toma decisiones autónomas locales hacia sus objetivos individuales... y comparte información o proporciona servicio a otros pares".

(Rohit Khare)
Stronger relationships
around the world...
Advantages of decentralised systems:

1. **Participation** - encourages diverse contribution
2. **Efficiency** - quicker, more locally-informed decisions
3. **Privacy** - allows organisations to keep some data private
Ventajas de los sistemas descentralizados:

1. **Participación** - fomenta una mayor diversidad de contribuciones
2. **Eficiencia** - decisiones más rápidas y más informadas a nivel local
3. **Privacidad** - permite a las organizaciones mantener algunos datos confidenciales
**Red** - what do you have concerns about?

**Yellow** - what do you have questions about? what is not clear?

**Green** - what do you like? what works well?
Rojo - ¿Qué os preocupa?

Amarillo - ¿Sobre qué tenéis dudas? ¿Qué no está claro?

Verde - ¿Qué os gusta? ¿Qué funciona bien?

Diversity of Ideas
First time here? Read this!

- Link
- Project home

Backlog
- Collect and summarise user feedback (forums / social media / design sprint / community calls) in one place
- Create (potential) competitor list
- Review GitLab's functionality
- Investigate RealtimeBoard for whiteboarding, etc.
- Create product advisory group
- Set up meeting with MoodleCloud team

Current sprint (20th June - 11th July)
- Onboard Outlandish to project
- Come up with alternative way to structure community calls
- Create video for partner forum about current status of MoodleNet
- Update MoodleNet white paper
- Figure out how to allow new MoodleNet users to look up / invite contacts from other social networks

In Progress
- Figure out various options to connect MoodleNet to Moodle instances
- Plan presentation for Barcelona MoodleMoot
- Draft community guidelines for contributing to the MoodleNet project
