

## DRAGGING AND DROPPING

**Upload media files faster and easier** by **dragging & dropping** directly onto course page

- In Moodle 3.3 you can now add sound and video files directly to your course page by dragging and dropping in the same way you can already add images.
- This feature improvement also gives you the choice of displaying the file as a clickable file source or as a label.
- Choosing the label option means that the media file will display in the media player for students to access immediately.
- Upload media files faster with the new drag and drop functionality in Moodle 3.3.

To see how the new improvements in activities work in Moodle 3.3, check out our step by step video at [youtube.com/moodle](https://www.youtube.com/moodle)
