moodle 3.3

FONT AWESOME

Popular, accessible icons in Moodle makes it **look better & work faster**

- Like many learning management systems, Moodle has many small icons throughout the interface.

- In Moodle 3.3, these small icons have now been replaced with images from the very popular Font Awesome project.

- **The use of Font Awesome provides a number of benefits:**

  ° it improves the performance and efficiency when showing Moodle pages;

° they look great at any size, and on any resolution screen;

° they are high-contrast (to AAA standard) and improve accessibility for those with poor vision;

° it allows theme designers to easily colour the icons to make them fit with their theme

° it provides a massive set of well-designed standard icons into Moodle core, providing great options for any Moodle plugin developer

To see how the new improvements in activities work in Moodle 3.3, check out our step by step video at **youtube.com/moodle**
