# moodle 3.3

IMPROVED DASHBOARD

Improved dashboard means **faster and easier access** to **required activities**

- A new course overview block, voted for by the Moodle Users Association, improves the dashboard by clearly displaying course progress and easy links to upcoming activities.

- When a student logs into Moodle, they will now see a timeline of activities due and direct links to the activities, which can be sorted by date or courses.

- The courses tab now also features an overview of current courses, those in progress and a list of past and future courses.

- Teachers also have a similar overview with reminders on relevant activities such as assignments that need to be graded being clearly visible and accessible.

- An improved block with easier access to all the things that educators and learners want and need enhance the user experience with Moodle.

To see how the new improvements in activities work in Moodle 3.3, check out our step by step video at **youtube.com/moodle**
