

MOODLE INTEGRATION

Access all your learning tools faster through Moodle's integration with Google G-Suite and Microsoft Office

- Moodle's integration with Google G-Suite and Microsoft Office means easier, faster access to all of the tools that teachers and students need, and the ability to open documents from other systems while on your Moodle site.
- To enable the integration, Moodle administrators need to do the one-time setup from the OAuth 2 services link in Site Administration.
- If a Moodle user already has an existing account, they can link their Microsoft Office or Google account from their preferences screen.
- For teachers, if the OneDrive and/or Google drive repositories have been linked, assignments submitted can be locked to students as they are being graded by teachers, making sure that there is consistency in the submitted work for productive grading by teachers.
- One login account to access multiple and many more accounts - one of Moodle's key objectives to improve users online learning experiences.

To see how the new improvements in activities work in Moodle 3.3, check out our step by step video at youtube.com/moodle
