Design and Analysis of Algorithms

May 2, 2016 - Oct 14, 2016

Algorithms are an essential part of any efficient solutions for computer applications that evolve with the...

Put **activities into "stealth mode"** to **achieve particular designs** for your courses

- Earlier versions of Moodle had a "quirk" that allowed activities to be hidden inside "extra" weeks or topics, but still be accessible to students. These were known as "orphaned" activities and allowed Moodle users to achieve particular designs for their courses.

- Now in Moodle 3.3 you can put any activity into "stealth mode" to achieve this same effect in a more officially-supported way.

- Teachers can now put activities into stealth mode so that they are not shown on the course page, but remain usable by students.

To see how the new improvements in activities work in Moodle 3.3, check out our step by step video at **youtube.com/moodle**
