 Wert Tuato	

## INSPIRE ANALYTICS

Inspire Analytics - our solution to open source learning analytics - helps educators support their learners by analysing their performance.

Inspire Analytics is now available in Moodle 3.4 core. Descriptive and Predictive data analysis to inform educators of their learners' performance in courses can assist in making decisions and providing the right level of support.

The addition of Inspire Analytics in this major release is just the beginning! We look forward to continue refining Inspire Analytics through user research and feedback from the entire Moodle users and community.
